

REMARKABLY POWERFUL. POWERFULLY LIGHT.

The eeBrake is the ultimate brake from start to finish— a uniquely robust patented design developed and refined by relentless engineering, both at the computer and through real-life testing. At half the weight than that of its competitors, eeBrakes continue to set new standards by which all other high performance road brakes are judged. The supreme upgrade for performance-oriented riders, a dramatically higher overall stiffness provides better modulation and more power. No detail has been overlooked, greater tire clearance and tool-less pad centering make installation simple.

FEATURES

MATERIALS	Forged High grade Aluminum, Titanium, and Stainless Steel
RIM WIDTH COMPATABILITY	18mm to 28mm
ADJUSTMENTS	Tool-free caliper centering adjustment Wheel removal - quick release
LEVERAGE COMPATABILITY	Optimized to work with Shimano, Campagnolo, and SRAM levers
ASSEMBLY	Assembled in Fletcher, North Carolina, USA
LOGO BADGES	Available in green, yellow, red, white, gray, and black
WARRANTY	3 Years
PART CODES	BEE0001 - Direct Mount Front BEE0002 - Direct Mount Rear BEE0003 - Regular Mount Front BEE0004 - Regular Mount Rear

WEIGHT

DIRECT MOUNT	79 grams* (Front) 76 grams* (Rear)
REGULAR MOUNT	82 grams* (Front) 80 grams* (Rear) *Pads not included
